INFRINGEMENT OF U.S. PATENT NO. 7,138,505

9 Plaintiffs refer to and incorporate herein the allegations of Paragraphs 1-8 above.

10 United States Patent No. 7,138,505 ("the '505 Patent"), entitled "Factor VIII:C Nucleic Acid Molecules," was duly and legally issued by the United States Patent and Trademark Office on November 21, 2006, after a full and fair examination. Plaintiffs are the assignee of all rights, title, and interest in and to the '505 Patent and possess all rights of recovery under the '505 Patent.

11 Defendants manufacture, use, offer to sell and/or sell recombinant antihemophilic Factor VIII, known generally under the trade names Kogenate® and Helixate®, for use in the treatment of patients with Hemophilia.

12 By virtue of the foregoing, Defendants are infringing one or more claims of the '505 Patent under 35 U.S.C. § 271 by performing, without authority, one or more of the following acts: (a) making, using, offering to sell, and/or selling within the United States the invention of one or more claims of the '505 Patent; (b) inducing infringement of one or more

13 Defendants are also infringing one or more claims of the '505 Patent under 35 U.S.C. § 271(f) by supplying or causing to be supplied from the United States all or a substantial portion of the components of the patented invention, where such components are uncombined in whole or in part, in such manner as to actively induce the combination of such components outside of the United States in a manner that would infringe the patent if such combination occurred within the United States.

14 Defendants have knowledge of the '505 Patent, and have not ceased their infringing activities. Defendants' infringement of the '505 Patent has been and continues to be willful and deliberate.

15 As a result of Defendants' acts of infringement, Plaintiffs have suffered and will continue to suffer damages in an amount to be proved at trial.
